Profile

Mobile Software Engineer with professional experience developing and maintaining production Flutter applications and enterprise mobile solutions. Experienced with Flutter/Dart, BLoC/Cubit, REST and ERP APIs, authentication, local caching, debugging, and performance optimization. Strong software engineering foundation with a Master's in Software Engineering and current MSc studies in Cybersecurity at ELTE. Experienced collaborating with backend, QA, configuration, and business teams to deliver reliable mobile solutions.

Professional Experience

Dzexpert *Jun. 2025 – Jun. 2026*

Software Engineer – Mobile Development

- Developed, maintained, and optimized enterprise mobile applications using **Flutter, Dart, and BLoC/Cubit** for a large industrial group.
- Built a mobile sales application integrated with **Odoo ERP**, supporting products, customers, inventory, and sales workflows; improved purchasing efficiency by approximately **15%**.
- Developed a production reporting application that digitized operator reporting workflows and improved reporting efficiency by approximately **8%**.
- Integrated mobile applications with backend and ERP services, implementing authentication, data synchronization, validation, business logic, error handling, and caching.
- Investigated and resolved production issues, optimized existing features, and collaborated with backend, QA, configuration, and business teams.

Shabakett Systems (Remote) *Jul. 2024 – Sep. 2024*

Mobile Developer Intern

- Contributed to existing mobile codebases and implemented new functionality using **Flutter, Kotlin, Jetpack Compose, and Kotlin Multiplatform**.
- Implemented QR scanning, product search, UI components, navigation, and application data management.

Selected Projects

Fidelity Mobile *Flutter, Cubit, Django, Dio, JWT*

- Developed a loyalty and warehouse integration application with **JWT authentication, automatic token refresh, QR generation/scanning, local caching, navigation, and error handling**.

Home Services Application *Kotlin, Jetpack Compose, MVVM, Retrofit*

- Developed a service-booking application with REST API integration, reusable UI components, navigation, network-state handling, and database functionality.

Education

Eötvös Loránd University (ELTE), Budapest *2026 – Present*

MSc in Computer Science – Cybersecurity

Mohamed Cherif Messaadia University, Algeria *2023–2025*

Master's Degree in Software Engineering – Graduated 1st in specialization

Technical Skills

Mobile: Flutter, Dart, Kotlin, Android, Jetpack Compose, Kotlin Multiplatform
Architecture: BLoC, Cubit, MVVM, MVC, Clean Architecture, State Management
Backend/APIs: REST APIs, Odoo RPC, Django, Node.js, Express.js, JWT, Dio, Retrofit
Data / Tools: PostgreSQL, MySQL, Supabase, Firebase, Git, GitHub, Postman, Android Studio, VS Code, Figma

Languages & Activities

Languages: Arabic (Native), English (Fluent), French (Fluent)
Karate: Karate practitioner since 2008 and a member in Japan Karate Association (JKA) since 2015. Assistant Coach in 2019 then promoted to Coach in 2022 and later on Head of the Karate Branch at my club since 2024. Earned **national and international competition medals** and participated in **national and international karate seminars**.
